Job Title: CNC Operator

Job Description: Measure dimensions of raw materials and finished work pieces to ensure conformance to specifications, using precision measuring instruments, templates, and fixtures. Remove and replace dull cutting tools. Mount, install, align, and secure tools, attachments, fixtures and work pieces on machines, using hand tools and precision measuring instruments. Operators are expected to carefully schedule their work so that all of the machines are always operating. Must be able to set and operate our range of CNC milling machines. Experience of programming controls and the ability to think creatively and work on own initiative is essential. A thorough understanding of engineering drawings and inspection experience is essential. Make machine adjustments that may be required, check dimensions, etc. to insure conformance to drawings. Inspect own work. Use of computer and necessary software as required. Load programs into machine control with some instruction. Prepares, pre-sets, and installs most all required tooling with some instruction. Adjust machine controls to maintain or correct part tolerances.

Previous Experience: Experienced & skilled in machining techniques. Some knowledge of CNC controls & programming.

Education: Computer control programmers and operators train in various ways - in apprenticeship programs, informally on the job, and in secondary, vocational, or postsecondary schools. In general, the more skills needed for the job, the more education and training are needed to qualify. Many entrants have previously worked as machinists or machine setters, operators, and tenders.
